**COURSE: BEST PRACTICES FOR TEACHING AFRICAN AMERICAN BOYS**

**PRESENTER: DR. JAWANZA KUNJUFU**

**CREDITS: 3 GRADUATE CREDIT**

## Course Overview

According to the most recent statistics, the dropout rate for African American males in US schools is over 50%. Dr. Jawanza Kunjufu links this trend with the disproportionate placement of these students in special education classes, a dearth of African American male teachers, and a failure to teach to African American boys' learning styles. In *Best Practices for Teaching African American Boys*, Dr. Kunjufu prepares educators to implement solutions to these problems in their classrooms and schools. He offers strategies for preventing the referral of students to special education that include constructing Afro-centric classrooms, integrating black male role models, supporting students' transitions through school and boyhood, accommodating these students' needs for curriculum that appeals to their interests and other characteristics, and designing instruction that exploits the best of their energy and intelligence. The course is punctuated by workshop discussions and classroom footage that illustrate the complexity of and solutions to the issues at hand, so that African American boys have the same opportunities for success as all of their peers.
